

Pathfinder Clean Energy (PACE) secures €100m facility from RGREEN INVEST to accelerate growth

Paris/London, June 23, 2026 - Pathfinder Clean Energy (PACE) announces it has secured a pivotal €100m convertible bond investment from INFRAGREEN V, the flagship infrastructure fund managed by RGREEN INVEST, a Paris-based independent investment management company specializing in financing the energy transition. This investment will accelerate the ongoing construction of PACE's UK clean energy assets and the continued expansion of its development pipeline.

This investment builds on the strong and aligned partnership established with INFRAGREEN V in June 2025 and reflects the significant progress PACE has made in bringing its solar and battery energy storage projects through construction. It will support PACE's evolution into an owner and operator of clean infrastructure helping finance the construction of nearly 400 MWp of solar and over 200MW of battery storage assets while advancing its broader clean infrastructure development pipeline including its clean data centre projects.

PACE's UK clean energy pipeline includes 8 projects totalling 250MWp with secured inflation-linked Contracts for Difference (CfDs) through the UK Government's latest Allocation Round 7 (AR7a).

The portfolio is underpinned by a co-location strategy combining solar PV and battery energy storage systems (BESS), with the proceeds of the financing primarily dedicated to the construction of these assets over the next two years.

Beyond its ready-to-build portfolio, PACE has a global development pipeline of more than 3 GW across the UK and international markets.

PACE's pipeline will be delivered by its in-house engineering and asset management team. This internal construction principle retains in-depth asset understanding and knowledge resulting in enhanced operational performance.

Rob Denman, Managing Director at PACE said: "RGREEN INVEST's continued commitment is a strong endorsement of what PACE has achieved since we began our partnership. We have transitioned from a development business into an active constructor and operator of clean energy assets, and this additional capital allows us to shift gears across our solar and co-located battery storage portfolio.

The UK's clean infrastructure ambitions are substantial, and PACE's permitted pipeline, experienced team and extensive construction programme puts us in an exceptional position to navigate delivery. Our UK and international developments put PACE at the forefront of the exciting and innovative clean infrastructure sector where the energy and digital sectors meet.

We look forward to continuing to grow our partnership with RGREEN INVEST as we expand into further projects and opportunities."

Nicolas Rochon, Founder & CEO of RGREEN INVEST: “PACE has demonstrated exactly the kind of disciplined execution and pipeline quality that merits our continued and increased support. Increasing our investment in PACE reflects our confidence in the team and our shared commitment to financial sustainability, the global energy transition and climate change.”

About Pathfinder Clean Energy (PACE)

Pathfinder Clean Energy (PACE) – a clean infrastructure developer and investor – was founded in 2017 and brings together some of the leading and most experienced figures in the clean energy and infrastructure sectors. Its team operates across the UK, continental Europe, Canada and New Zealand, backed by world-leading clean energy investors.

PACE brings together over 100 years and 5GW of clean energy experience with AI-integrated proprietary technology accelerating development and creating a platform for efficient in-house construction.

PACE’s understanding and management of the complete life cycle of a project provides a route to deploying capital at scale and across multiple international clean infrastructure markets.
